

Environmental Policy

IKM's aims and objectives for safeguarding the environment

AIMS

IKM recognises that in pursuing company objectives it has a responsibility to protect and nurture the environment.

By exercising proper control over its activities the company will promote the use of sustainable resources and discourage wasteful or damaging practices.

We aim to promote environmental awareness throughout the organisation in order to minimise the environmental impacts of the cabling and installation products and services we provide to clients.

It is our policy to develop, perform and maintain our operations in an environmentally considerate manner.

COMMITMENTS

We will continually improve our environmental management system and processes

We will reduce and, where practicable, eliminate pollution

We will comply with all applicable legislative and regulatory requirements and guidelines and fulfil all obligations and undertakings to which we voluntarily subscribe, including those of the international standards ISO14001 and ISO9001, in respect of which we are committed to maintaining a fully compliant and externally certified Integrated Management System.

We will look to control and effectively manage aspects relating to energy, water, transport, waste and social responsibility, and will establish objectives and targets and programmes for their achievement.

This policy and its supporting policies will be documented, maintained and communicated to all persons who work for or on behalf of the organisation, and will be available to the general public via our website.

OBJECTIVES

In order to achieve its aims the company has identified the following key objectives, against which, wherever practicable, measurable targets will be set and programmes established to manage and monitor performance:

1. Whenever reasonably practicable, identify and eliminate the threat of any contamination to the environment.
2. Whenever possible, control and minimise the use of energy, materials and water.
3. As far as economically viable to re-cycle, all materials, packages and other waste.
4. Make firm realistic commitment to enhance the environment for all.
5. Where the risk of pollution cannot be eliminated, to monitor and tightly control the risk of such an occurrence.

COMMUNICATION

IKM will communicate summaries of the company's environmental performance both internally and to the outside community.

IKM will communicate this policy to all persons working for the company or on its behalf and make it available to the general public through its website.
